DETAILED ACTION

Allowable Subject Matter

Claims 1 and 3-9 are allowed. The following is an examiner's statement of reasons for allowance:

The prior art, alone or in combination fails to teach all limitations of independent claim 1, including a vascular occlusion coil deployment system having an electrically heated coil heating element mounted on the distal end of a delivery member, and a unitary non-metallic heat responsive coupling member comprising a biocompatible adhesive, coupled directly to the heating element coil.

O'Reilly (US 4735201) teaches a device having a heat responsive biocompatible adhesive, however, does not teach an embolic coil or the unitary non-metallic heat responsive coupling member coupled directly to an electrically heated coil heating element as required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
